

## Multilex Bulletin - December 2024

The Multilex Bulletin is an indication of notable changes made to the Multilex database. It also provides general information and advance warnings of changes for future months. Changes to product name are expressed in the form of the Multilex Preferred Display Name. Customers using other naming conventions may not see the changes as listed. Visibility of changes is dependent on the current data being loaded into your system and the specified element being available via your interface.

This document is not a list of all changes to the Multilex database.

The Multilex Bulletin is also available at [www.fdbhealth.co.uk](http://www.fdbhealth.co.uk)

### **Mandatory Instructions**

We have completed a cyclical review of our mandatory instructions, resulting in several updates to ensure alignment with our current Editorial Policies.

## **Advance Warnings**

### **Topical corticosteroid potencies**

The MHRA have implemented changes for the labelling of topical corticosteroid potencies. As a result, the FDB Editorial Policy around these products and their duplicate therapy alerts are under revision. It is expected the potency classification will be revised to align with the MHRA labelling when possible. This is to reduce the risk of conflicting potency information being displayed in systems compared to the physical product.
