

Multilex Bulletin July 2024

The Multilex Bulletin is an indication of notable changes made to the Multilex database. It also provides general information and advance warnings of changes for future months. Changes to product name are expressed in the form of the Multilex Preferred Display Name. Customers using other naming conventions may not see the changes as listed. Visibility of changes is dependent on the current data being loaded into your system and the specified element being available via your interface.

This document is not a list of all changes to the Multilex database.

The Multilex Bulletin is also available at www.fdbhealth.co.uk

Other Changes

GnRH analogues – SLS changes

Government restrictions have been introduced in Great Britain on the use of gonadotropin releasing hormone (GnRH) analogues for the treatment of gender incongruence or gender dysphoria in patients under 18 years of age.

Multilex will provide an SLS attribute for customers in England to support the change. For further information see 'The National Health Service (General Medical Services Contracts) (Prescription of Drugs etc.)(Amendment) Regulations 2024' (legislation.gov.uk).

General Information

General notice

Due to a program of work to improve prescribability, a small number of nasal spray products may not be transmittable through ETP in this month's data. The work will be concluded, and the issue resolved prior to the next datacut.
